

Nicole Dagnenica | Full Stack Developer

Summary

Full Stack Web Developer and Digital Art Designer with a passion for learning and developing my skills in the exciting environment of web development and design. I have experience in Ruby, Ruby on Rails, Javascript, React, Redux, HTML, CSS and Photoshop and a background in product development. Through my career with a major retailer, I have developed strong skills in design, communication, team-building and management that will make a positive impact on a company's profitability.

Projects

E-Comm: Links to: [Github Repo Front End](#), [Github Repo Back End](#), [Video](#)

An E-Commerce application where a user can create a business and sell products.

- Created a full stack E-Commerce application using the React, Redux and Ruby on Rails framework.
- Designed application using a mobile first approach with HTML, CSS.
- Implemented CRUD actions on database models.
- Used restful routing and dynamic routes.
- Designed database schema and wireframe.

Project Dashboard: Links to: [Github Repo](#), [Heroku App](#), [Video](#)

A project management application which a business can use to create and track client projects.

- Created a Ruby web application using Ruby on Rails CRUD, MVC framework.
- Implemented restful routing and nested routes.
- Designed database schema and stored data using Sqlite and Active Record.
- Added validations and flash error messages to prevent invalid data from being saved.
- Leveraged Bcrypt to secure user passwords and authenticate logins.
- Used OmniAuth and Oauth authentication with Github.

Project Dashboard with Javascript: Links to: [Github repo](#), [Heroku App](#), [Video](#)

This is an extension of Project Dashboard project.

- Created an internal API and used AJAX to render an index, show and form submission .

Sleepy Star: Links to: [Github Repo](#), [Heroku App](#), [Video](#)

A web application for a user to track a Baby's sleep schedule.

- Created a Ruby web application using Sinatra CRUD, MVC framework.
- Designed database schema and stored data using Sqlite and Active Record.
- Added validations and flash error messages to prevent invalid data from being saved.
- Leveraged Bcrypt to secure user passwords and authenticate logins.

Book Review: Links to: [Github Repo](#), [Video](#)

Ruby to create a CLI application to view the top 50 books that all kids should read before they are 12 years old as provided and reviewed by Common Sense Media.

- Used Nokogiri to scrape data from Common Sense Media.
- Created objects using Ruby.
